SUMMARY

Software Engineer with 6+ years of experience building scalable full-stack and backend systems, APIs, and cloud-native applications using Python, JavaScript, FastAPI, Node.js, AWS, and PostgreSQL. Experienced in building production-grade distributed systems, shipping user-facing features, designing RESTful APIs, and working in fast-paced Agile environments with strong product ownership and cross-functional collaboration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS

Backend: Node.js, FastAPI, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB (schema design, optimization)

Cloud/DevOps: AWS, Docker, Kubernetes, CI/CD

Tools: Git, GitLab, Postman, OAuth 2.0, JWT

AI/Developer Tools: Cursor, Claude Code, GitHub Copilot, LLM APIs, Prompt Engineering

EXPERIENCE

Pivotor.ai, USA

Jan 2026 – Present

Software Engineer / Applied AI Engineer

- Built scalable backend services and REST APIs using FastAPI for production-grade distributed systems.
- Designed and deployed cloud-native applications using AWS with Docker and CI/CD pipelines enabling reliable feature delivery.
- Integrated LLM APIs into backend workflows to enhance automation and system capabilities.
- Used AI-assisted development tools (Cursor, Claude Code, Copilot) to accelerate debugging, refactoring, and feature development.
- Collaborated with frontend engineers, product teams, and stakeholders to define API contracts and deliver user-facing features end-to-end.
- Debugged production issues affecting system reliability and optimized backend performance under real user load.
- Designed database schemas and optimized data flows for scalable applications.

Torry Harris Integration Solutions, India

Sep 2022 – Feb 2024

Senior Software Engineer

- Developed scalable full-stack applications using React, Node.js, PostgreSQL/MongoDB and AWS.
- Designed REST APIs and backend services powering user-facing enterprise applications.
- Built secure authentication systems using OAuth 2.0 for enterprise-grade platforms.
- Improved API performance by 25% through backend optimization and refactoring.
- Participated in Agile development cycles including sprint planning, backlog refinement, and retrospectives.
- Collaborated with QA and engineering teams to ensure stable production releases.

Torry Harris Integration Solutions, India

Aug 2021 – Sep 2022

Software Engineer

- Built frontend and backend features using JavaScript and React for enterprise applications.
- Integrated APIs into user-facing systems and improved application performance.
- Worked on authentication flows and system integration components.

Torry Harris Integration Solutions, India

Jul 2019 – Aug 2021

Associate Software Engineer

- Developed backend integration services improving system interoperability and data flow.
- Worked with SQL-based systems for data processing and troubleshooting.
- Resolved production issues and supported live systems.

mPower, India

Jan 2019 – Jun 2019

Software Engineering Intern

- Assisted in backend development, API integration, and testing for enterprise systems.
- Supported debugging and validation of data flows in development environments.

PROJECTS

LLM Web Assistant – Built AI-powered chat application using OpenAI APIs with backend persistence.

E-Learning Platform – Full-stack application with scalable backend and dynamic content delivery.

Search API Integration – Backend service for real-time data retrieval and API orchestration.

EDUCATION

Bachelor of Engineering in Computer Science

Visvesvaraya Technological University

2015 – 2019
